Education

Cornell University

B.S. in Information Science & Computer Science

Ithaca, NY

Expected May 2028

Concentration: Data Science; **GPA:** 3.89/4.0

Relevant Courses: Python, Statistics and Data Science, Linear Algebra, Networks, AI Law and Ethics

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, C++, R, HTML/CSS

Web and Data: React, Next.js, APIs, GeoJSON, JSON/CSV, RAG

Engineering: Linux/Unix, Git/GitHub, pytest, EPICS IOC, StreamDevice

Experience

Cornell University Gao Lab

Ithaca, NY

Research Assistant

Aug 2026 - Present

- Evaluated 4 public-data routes for multi-source RAG, checking source access and alignment of research evidence.
- Prototyped a 4-module workflow using synthetic research data, checking query and evidence outputs.
- Designed paired RAG evaluations on fixed snapshots to compare answer quality, evidence coverage, and cost.

University of Science and Technology of China

Hefei, China

Software Engineering Intern

Jun 2026 - Aug 2026

- Converted materials data, temperature records, and literature into Python datasets for cross-study analysis.
- Checked extracted DOI, material, and temperature fields against expected values to validate research datasets.
- Developed browser views and JSON/CSV exports, enabling internal lab researchers to review processed records.

Claude Design Club

Ithaca, NY

AI Product Designer, Member

Feb 2026 - May 2026

- Defined requirements and user flows for a roommate communication prototype to guide product development.
- Checked guided communication workflows against edge cases and acceptance criteria to identify failures.
- Translated user feedback into prioritized prototype changes to refine the communication experience.

Venture Starters

Remote

Venture Capital Intern (Part-time)

Dec 2025 - Feb 2026

- Standardized screening for 10+ startups by modeling product, market, operating, and growth metrics.
- Built repeatable diligence models by integrating financial, market, and operating inputs.
- Supported investment prioritization with concise summaries of evidence from startup screening.

Tianjin Hotworld Technology Co., Ltd

Tianjin, China | Hybrid

Business Analytics Intern

Oct 2025 - Dec 2025

- Automated collection, cleaning, and dashboard preparation for recurring analysis of 10+ software companies.
- Identified revenue, cost, retention, and growth drivers by modeling operating data for planning reports.
- Supported cross-functional planning by converting fragmented operational data into decision-ready reports.

Rednote (Xiaohongshu)

Remote

Independent Content Creator, Data & Analytics

Sep 2023 - Sep 2025

- Compared 2 videos posted within 1 month; one had 468% higher engagement and 287% more impressions.
- Informed content selection by analyzing audience behavior, distribution signals, and post performance.
- Established repeatable content reviews by translating performance findings into content and growth decisions.

Projects

ARPES Superconductivity Explorer

Jun 2026 - Present

- Automate extraction from papers into JSONL/CSV datasets with Python scripts for internal lab research.
- Build search across materials, critical temperatures, figures, and metadata to support literature comparison.
- Preserve source-paper links with extracted findings so research evidence can be traced and checked.

LakeShore336 - ARPES Temperature Control

Jun 2026

- Standardized temperature-control interfaces with 27 EPICS IOC records and 9 StreamDevice protocols.
- Converted live temperature and heater readbacks into browser displays and CSV logs of experimental conditions.
- Enabled repeatable control-software checks without hardware through a demo mode and 16 regression tests.

Cornell Wall Street Club & HAMA Websites

May 2026 - Jun 2026

- Developed 2 student organization websites with HTML, CSS, and JavaScript for member and recruitment resources.
- Rendered HAMA member directories and individual profiles from shared JavaScript data using URL-based lookups.
- Built responsive WSC pages with Bootstrap to organize finance career paths, recruitment events, and team profiles.

Porch - Claude Hackathon

Mar 2026

- Collaborated with 1 teammate on a civic-resource app; built its frontend with Next.js, React, and TypeScript.
- Organized multi-source records on officials, shelters, and food banks for consistent display in city views.
- Implemented interactive GeoJSON maps to help users explore local districts and community resources.
