

Coco (Luhan) You

Ithaca, NY | ly458@cornell.edu | 205-787-0334 | cocoylh.com | linkedin.com/in/cocoyou

Education

Cornell University

B.S. in Information Science; B.S. in Environment and Sustainability

Ithaca, NY

Expected May 2028

Concentration: Data Science **Minor:** Business **GPA:** 3.89/4.0

Relevant Courses: Python, Statistics and Data Science, Linear Algebra, Networks, Product Strategy, AI Law and Ethics

Technical Skills

Languages: Python, JavaScript, TypeScript, HTML/CSS, R, Java

Skills: statistical modeling, data cleaning, KPI design, A/B testing, financial analysis, LLM workflows, GitHub, Excel, APIs

Experience

University of Science and Technology of China (USTC)

Hefei, China

AI Modeling Intern

June 2026 -- Present

- o Build AI modeling workflows for ARPES research linking materials, temperature data, and literature evidence
- o Develop browser-facing model interfaces and structured outputs for experiment records and comparisons
- o Translate research requirements into schemas for material properties, ARPES notes, figures, and model inputs

China Merchants Securities

Beijing, China

Investment Banking Intern, Fixed Income

June 2026 -- Present

- o Organized issuer, bond transaction, credit, and market datasets for fixed income analysis workflows
- o Structured credit variables, issuer fundamentals, market references, and comparable deal data for review
- o Prepared analytical notes connecting market data, issuer fundamentals, and fixed income financing decisions

Claude Design Club

Ithaca, NY

AI Product Designer

February 2026 -- Present

- o Defined requirements for roommate workflows, ownership gaps, communication pain points, and MVP scope
- o Designed LLM flows for concern rewriting, conflict detection, suggestion generation, and guided input
- o Prototyped AI patterns for agreements, shared tasks, responsibility assignment, and follow-up tracking

Venture Starters

Remote

Venture Capital Intern

December 2025 -- Present

- o Built analysis frameworks for 10+ startups to identify performance, market, operating, and growth drivers
- o Integrated financial, market, and operating data into repeatable diligence templates and summaries
- o Translated startup data into screening, prioritization, and investment decision insights for partner review

Tianjin Hotworld Technology Co., Ltd

Tianjin, China / Remote

Business Analytics Intern

September 2025 -- December 2025

- o Built models for 10+ software companies to identify revenue, cost, retention, and recurring growth drivers
- o Designed KPI workflows from data collection through analysis, reporting, and dashboard-ready outputs
- o Converted messy operational data into structured reports for product, growth, and business decisions

Rednote (Xiaohongshu)

Remote

Content Creator, Data and Analytics

September 2023 -- September 2025

- o Built user behavior frameworks to optimize distribution, audience targeting, retention, and content formats
- o Ran A/B-style tests, growing engagement 468% and impressions 287% across content formats and topics
- o Tracked metrics to convert engagement data into repeatable product insights and content iteration loops

Projects

ARPES Superconductivity Explorer ↗

June 2026 -- Present

- o Built a static ARPES research data website for materials, literature, figures, and source search workflows
- o Parsed article text/PDF inputs into structured JSONL and CSV records for downstream research review
- o Designed search UX for material families, Tc values, ARPES notes, figures, sources, and metadata
- o Built local Python extraction workflows for Web of Science, Google Scholar, PDF, and text imports

LakeShore336 -- ARPES Temperature Control ↗

June 2026

- o Built EPICS IOC records and StreamDevice protocols for Lake Shore 336 temperature controller workflows
- o Developed browser dashboard for ARPES warmup control, sample/cold-head readbacks, and heater status
- o Implemented setpoint, ramp rate, PID, heater range, and stepwise rhythm warmup controls in Python
- o Added CSV logging, safety warnings, demo mode, and English/Chinese labels for operator use

Porch -- Claude Hackathon ↗

March 2026

- o Collaborated with teammate to build a public awareness tool for nearby political distribution and civic context
- o Mapped local officials, districts, political boundaries, animal shelters, food banks, and community resources
- o Integrated address search, city detection, interactive maps, onboarding, authentication, and Ithaca/NYC views
- o Supported resource discovery through address-based views for shelters, food banks, and civic services
